

EIA Natural Gas Inventory Weekly Change Average (As of 10 Aug 2007)

The Expected change is estimated from the average of 1994 to 2007 published by EIA with the adjustment of 13% based on 2% per year growth*. This curve fits the real data much better than the EIA's 5 year average.

* EIA Energy Review 2006 publishes that from 1985 to 2005 NG consumption increases 1.5% per year on average.
